

Please reject NAB's petition 04-160. As a paying subscriber of XM radio I find it ridiculous that the NAB would use such tactics to stifle competition. XM Radio is a priviledge & I listen to it because Radio is so full of commercials and lacks quality music and information. 24 hour Traffic and Radio is not available anywhere else; if I want traffic on FM or AM I have to waste time listening to other things when I don't have extra time. XM is the future and free enterprise should prevail. Let the Market decide such questions.
